DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see remarks page 8 - 9, filed 01/06/2011, with respect to the rejection under 35 U.S.C. 112 first paragraph have been fully considered and are persuasive. The rejection of previously presented claims 16 and 33 (now part of independent claims 31 and 35) has been withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aseet Patel on 2/10/2011.

The application has been amended as follows:

In claim 35, page 6 line 1, "tangible" has been changed to - - non-transitory - -.

Allowable Subject Matter

3. Claims 17-32 and 34-36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent **claims 31 and 35**, prior art of record fails to show or reasonably suggest that a command signal is determined to be associated with a personal video recorder operation by determining whether the command signal immediately follows two consecutive command signals determined to be associated with a user activated control unit, in combination with all the other limitations presented in independent claims 31 and 35.

Regarding **claims 17 – 30 and 32**, these claims depend from allowable independent claim 31; therefore, claims 17 – 30 and 32 are allowable as well.

Regarding **claims 34 and 36**, these claims depend from allowable independent claim 35; therefore, claims 34 and 36 are allowable as well.

Citation of Pertinent Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Matz et al. (Patent No US 7,212,979) – Systems and methods for identifying a desirable subscriber by utilizing past subscriber content choices, using a data analyzer.
- Yang (Patent No US 5,894,331) - A method of checking sleep mode function in a TV, by turning off power when there is no response to a message outputted for confirming a viewer's continued viewing.
- Ferman et al. (Pub No US 2004/0073918) – A system which identifies the user's preferences based upon their historical content selection.
- Ukai et al. (Patent No US 7,096,486) - A TV program selection support system which selects only programs suiting viewer's preference.
